Rss	nvarchar(255)	NULL
Active	bit	NOT NULL
CategoryID	int	NULL
BlogID	int	NOT NULL
PostID	int	NULL
NewWindow	bit	NULL

I believe this links content to categories as well as stores links. Anyone care to elaborate on the purpose of this table?

I found some entries with a PostId of -1. Not sure what that means. I removed them from my local installation and added a foreign key so I get an exception when it tries to enter -1.
